

HYGEM-05

ANTIWEAR HYDRAULIC OILS

Hygem-05 is a low viscosity, superior Hydraulic and circulating oil derived from highly selective refined mineral oils. They have natural lubrication to work smoothly at elevated temperatures. Hygem-05 impart excellent anti wear, anti oxidant and anti foaming properties. Hygem-05 is very hydrolytically, chemically and thermally stable. It provides outstanding lubrication to wide range of equipments. The excellent demulsifying property helps quick water-oil separation in case of any occurrence. Hygem-05 gives satisfactorily long-life service, reduce cost and down time. It is compatible with nearly all type of rubber seals.

CHEMICAL & PHYSICAL PROPERTIES

PARAMETERS	PROPERTIES
Appearance	Light Yellow
Kinematic Viscosity @ 40°C c.st.	5 to 7
Density @ 27°C c.st.	0.83
Pour Point max.	-5°C
Flash point min.	Min. 110°C
