

METALFORM RN-180

Water soluble Metal Forming Oil

The product is designed for easy metal forming operations with excellent finish, total prevention of seizer of moving parts. The product has high EP value. MetalForm RN-180 is unlike others; low viscosity and easy to apply.

The product has excellent oxidation stability, lubrication and antiwear qualities **It can be washed with Plane Water hot water alkaline degreasing solution before plating or painting.**

MetalForm-RN-180 is useful for operations like Forming, wire drawing, deep drawing & cab body drawing operations with all ferrous & alloy steel & plated materials.

CHEMICAL & PHYSICAL PROPERTIES

TEST PARAMETERS	SPECIFICATIONS
Appearance	Clear Golden Yellow
Density @25° C	1.08 ± 0.02
Kinematic Viscosity @ 40°C	70 ± 10
Flash point	190 ± 10° C
Copper Strip Corrosion Test	Passes Test
Application	By Brush or Roller
