

MACHINE OIL 40

General Purpose Lubricating oil.

The effectively designed for providing effective lubrication to the moving parts of the CNC and other modern multi tolling and multi spindle machines;

It is blended with the right formulation and proportions to provide lubrication and also to some extend rust prevention to the machine's parts.

CHEMICAL & PHYSICAL PROPERTIES

TEST PARAMETERS	SPECIFICATIONS
Appearance	Clear, Light Yellow
Flash Point	190 ± 5°C
Kinematic Viscosity in c.s.t. at 40°C	32 ± 3
Density @ 40°C	0.88 ± 0.02
Cast iron corrosion test	Passes test
