

METALFORM RN-200

Water Washable Metal Forming & Drawing Fluid

The product is designed for easy metal forming & metal drawing operations with excellent finish, total prevention of seizer of moving parts. The product has high EP value. MetalForm RN-200 is unlike others; the oil film is easily washable with water. The work place remains clean all the time.

The product has excellent oxidation stability, lubrication and antiwear qualities along with antiurusting properties. The laborious washing operation with hazardous Kerosene or solvents is totally reduced.

MetalForm-RN-200 is most economical and useful for operations like wire drawing, deep drawing, cold extrusion & cab body drawing operations with all ferrous & alloy steel & plated materials. It can be applied with brush or spray method.

CHEMICAL AND PHYSICAL PROPERTIES

TEST PARAMETERS	SPECIFICATIONS
Appearance	Clear Amber Liquid
Density @25° C	1.10 ± 0.02
Kinematic Viscosity @ 40°C	110 ± 10
Flash point	180 ± 10° C
Copper Strip Corrosion Test	Passes Test
Application	By Brush or Roller
