

METALFORM RN-60

Metal Forming & Drawing Fluid

The product is designed for easy metal forming & metal drawing operations with excellent finish, total prevention of seizer of moving parts. The product has medium EP value and viscosity.

The product has excellent oxidation stability, lubrication and antiwear qualities along with anti-rusting properties. The low viscosity of oil provides faster cooling rates and also uniform anti-wear layer throughout the operation.

MetalForm-RN-60 is most economical and specially designed for high speed nut forming operations.

CHEMICAL AND PHYSICAL PROPERTIES

TEST PARAMETERS	SPECIFICATIONS
Appearance	Clear Amber Red
Density @25° C	0.95 ± 0.02
Kinematic Viscosity @ 40°C	50 ± 5
Flash point	160 ± 5° C
Copper Strip Corrosion Test	1b
TAN, mg KOH/gm	0.0
Application	Pumped by Motor
