

RUSTPROOF 09

General Rust Preventive Oil

Rustproof 09 is made from highly refined petroleum base. It is non-drying type of rust preventive oil. The low viscosity of the oil helps in faster coverage of the object and also displaces any water left on the surface or in different pockets. It can withstand oxidation up to 2-3 months for indoor purpose.

CHEMICAL & PHYSICAL PROPERTIES

TEST PARAMETERS	SPECIFICATIONS
Appearance	Clear, Light Brown
Density at 27° C	0.84 ± 0.02
Viscosity at 40° C (C.St.)	8 ± 2
Flash Point	140 ± 10° C
